AGAIN WE SAY

That power and reliability are the chief requirements in the automobile. ¶ Do you know what it means for an automobile to go 1,094 miles in twenty-four hours? ¶ Do you realize how much faster this is than the speed of the Pennsylvania Limited between Indianapolis and New York City? ¶ Do you realize how perfect must be the engine—the gears—the wheels—the steering parts—in fact, every bolt and nut in a car to travel twenty-four hours at a speed greater than is maintained for the same distance on any railroad in the world? ¶ Do you know that the **National** now holds more individual mile records than any car in the world? ¶ Do you know that the **National** car is the only car made in America capable of taking this king of all records away from the French car—"the Decouville"—former holder of the record? ¶ Do you know that Indiana is the first State in America building automobiles—Indianapolis the first city in the world in the manufacture of high grade automobiles? ¶ We invite you to call and see our 1906 line of the best automobiles to be had in America, including the **National**, the Stodard Dayton, the Premier and the Maxwell.
