 ... when it comes to building...  
 ... that envying the world and...  
 ... their own playgrounds, these...  
 ... have got to be saluted.

Clemens started the 250-mile race like a man going on a joy ride. With his feet cocked up on the "dashboard" and leaning leisurely back against the seat, he played his hand with care and ease, while others ran circles all around him early in the race. But Clemens plugged away. He knew that it was a long contest. His skill told in the long run and the Stoddard-Dayton carried him to victory. To his credit he was much more alert than his apparent listless attitude betrayed.

Another banquet will be held tonight at the Denison. It is the convention occasion for Stoddard agents.

A large auto built of flowers and ferns was the centerpiece for the banquet table and was illuminated with electric lights. More than 1,200 factory employes from this firm are attending the races.

**AITKEN DISPLAYS NERVE.**

Races, With One Eye Open After Stone Breaks Goggles.

"Talk about nerve," said George Dickson, team manager of the National squad, "well I guess Johnnie Aitken sure deserves a medal." This remark was made after the nervy Indianapolis pilot pulled in his big throbbing, purring, sputtering monster of speed after the second race. While half way round the course in the first lap a stone flew up and struck the driver's left goggle glass, breaking it and slightly injuring his eye.

With only one eye working, Aitken completed during the remainder of the event. He was held up by the pit where the accident was waiting. "One of the best judges is out of commission."
