INDIANAPOLIS GARS HOLD PROMINENCE

Automobiles Made in Hoosier Metropolis Cut Wide Swath at Atlanta Show.

LOCAL FIRMS WELL PLEASED

Exhibitors Return With Word
That South Presents Excellent
Field for Sales.

Indianapolis-made cars cut quite a figure in the big automobile show which closed yesterday at Atlanta, Ga., and the various officers of these companies are united in the opinion that it afforded them an excellent chance to-demonstrate to a comparatively new field the South the merits of these local mackines. Many prospective buyers were present at the Atlanta exhibit and praised the mechanical fitness of the Hoosier capital's products.

Indianapolis was surely on the map at the Southern metropolis, and the local creations of speed, comfort and durability neatly packed up in the shape of bright polished and prettily upholstered nuromobiles, proved a big boost to the assertion that none of the other cities has room to boast of being ahead of this city in the motor world.

Conspicuous among the exhibits of Indianapolis-made cars were those of the Waverley, Marmon, Premier, Overland, Cole and Parry companies.

In an interview with H. H. Rice and H. H. Kennedy of the Waverley Company,

of these local macaines. prospective buyers were present at the Atlanta exhibit and praised the mechanical fitness of the Hoosier capital's products.

Indianapolis was surely on the map at the Southern metropolis, and the local creations of speed, comfort and durability neatly packed up in the shape of bright polished and prettily upholstered auromobiles, proved a big boost to the assertion that none of the other cities has room to boast of being ahead of this city

in the motor world.

Conspicuous among the exhibits of Indianapolis-made cars were those of the Waverley, Marmon, Premier, Overland,

Cole and Parry companies.

In an interview with H. H. Rice and H. H. Kennedy of the Waverley Company, both of whom attended the Atlanta show, they said that a large display of 1910 models, including practically every make of electrics, presented a vivid scene on the spacious display floor.

Exhibit Three Models.

The product was exhibited by Roy A. Potts and E. L. Buker and consisted of Model 75-C (Waveriev brougham). Model (Waverley Victoria phaeton) Model 74 (Waverley stanhope), all of which were of the 1910 design. The one suggestion for the betterment of the Atlanta venture given by the Waverley representatives was that concerning the combination system by not having the show and races going on at the same

W. H. Brown, vice president of the Overland Company, was present at the show with his family and was enthusiastic as to the nature of the exhibit. He said: "The Overland and Marion was well repstrators on the street with our products, a car to the public which will be a com-The armory was well decorated and from an exhibit standpoint was fully equal to annex and even under the stairway.

"The Marion models were placed directly at the door of the main entrance and the Overlands occupied a position in the balcony. We received our share of Although the equal of the New orders. York and Chicago shows from the exhibit standpoint the national scope of the show, which the Atlanta authorities were so anxious to obtain, failed to materialize.

AT WH

Most of the prospective buyers came from Mar the Southern field." seve

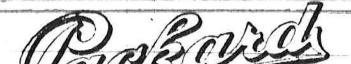

Max Parry of the Parry Automobile Company in an interview said: though our exhibit at the Atlanta show was not as auspicious as many of the other manufacturers, we were well repaid for our efforts. Considering the fact resented and aside from seven machines that we have only been in the field three in the show proper we had five demon- months and in that time have presented petitor against all makes, we were glad of the opportunity of showing to the big that of any I ever saw. Every bit of field which the South affords the pheavailable space was taken in the balcony, nomenal growth of our product in such a on the main floor, in the basement, the short period of time.

"I believe that the demand for a popular-priced ear in the South and Southwest, such as the one we had on exhibit at Atlanta, will meet with the general approval of the people in that section of the country. We are especially gratified at the results obtained."

Howard Marmon of the Marmon Company said: "The Atlanta show proved to be a big boost for our product. After our

the

of motor cars which will be purchased in the Southeast during the season of 1910 will exceed the total number bought up to this time. This can not only be attributed to the great interest which has been stirred up, but the fact that Georgia, according to all reports, is favored with unusually good crops, while the Southwest, and Texas in particular, is suffering a shortage.

"That the automobile can secure so full an endorsement and firm a footing in the new field in such brief time is attributable only, to the fact that the motor car has amply proved its reliability and worth.

Hall Has Facilities.

"The Atlanta show, of course, will not compare with the New York and Chicago shows, but its new exhibition hall offers unusual facilities, and the show was one of the most complete and attractive which has ever been held outside of the two great centres."

"As a rule but little actual business is transacted at shows, but the results of the show as they relate to the Premier car, have been very gratifying, and an agreeable surprise."

agreeable surprise."

J. M. Clarke of the National Motor
Vehicle Company, speaking of the show,
said:

"Wo believe that the Automobile

"We believe that the Automobile show just closed at Atlanta has opened up an immense new territory for the sale of motor cars and that many manufacturers who, up to the present time, have been skeptical of the ability of the South to provide a market for their products, are now enthusiastic over the prospect for trade in the new terri-

Prove Good Critics.

"A matter of much comment among the demonstrators at the various exhibits was the critical way prospective buyers looked over the various cars, and showed that Instead of finding a great number of peo-ple who knew very little about automoolles, they found that the visitors at the show were as critical as the average buyer at any of the large shows in the East or West.

"A matter of much pleasure to the National Motor Vehicle Company was the fact that so many prospective buyers were acquainted with the merits of our cars, and this was all the more appreciated by us, as up to the present time the National Motor Vehicle Company has made very little effort to place its cars in the South, owing to the fact that its product has been taken up so rapidly in the large centers north of the Mason and Dixon

"From the interest shown by individual purchasers and the large number of contracts made with dealers for the sale of National cars during 1910, it is the opinion of this company that the South will furnish a considerable outlet for National cars during the coming year.

"The name which the National car has made for itself during the last several years in a large number of contests, races and hill climbs seems to have penetrated through every section of the South and many comments were heard from visitors who stood outside of the exhibit.

"The business done at the Atlanta show by this concern was satisfactory from every standpoint and exceeded our most hopeful expectations and we believe that every other manufacturer who exhibited at Atlanta feels that he has been repaid in every way for the large expenditure to which he was put to make attendance at. the show possible."
