

BALLOON INDIANA MAKES A LANDING

Fisher and Bumbaugh De-
scend Near Ruskin, Tenn.,
at 6 p. m., Monday.

UP 48 HOURS 30 MINUTES

This Probably Breaks Duration Rec-
ord—University City Gets
Distance Trophy.

The balloon Indiana, Carl Fisher pilot,
O. L. Bumbaugh assistant, landed at Rus-
kin, Tenn., at 6:30 o'clock last night.
Fisher claims continuous flight of forty-
eight and one-half hours.

This, if established, and not equaled by
the University City, whose landing time
in the same race in which she won the
long flight record, is not known, sets a
new American duration standard, the
forty-four-hour flight made by Alfred Le-
Blanc in the great St. Louis races in 1907
having stood up to this time.

The Indiana's claim will be closely scruti-
nized, however, and stories of the bal-
loon coming down for water will be in-
vestigated.

Confusion in Balloons.

was reported.

Confusion in Balloons.

By straightening out a confusion in the two St. Louis balloons—the University City and the St. Louis III—the former is shown to have won the long-distance flight record of the national race.

According to reports this morning the St. Louis III, which came down in Lincoln county, Tennessee, at 7 o'clock Sunday evening, was reported as the University City, and that balloon was credited with landing at Blanche, Lincoln county, Tennessee. Late yesterday reports were received from Kelso, in the same Tennessee county, that the St. Louis III had landed there.

It was thought strange, at the time when the landings were being recorded, that the two balloons, after a 330-mile flight, should have landed within ten miles of each other.

This morning, however, reports came in that pilot Berry had landed the University City six miles southeast of Ft. Payne, Ala. This is near Lookout mountain.

Kealed very closely on government maps, the scale of which is supposed to be correct, the landing place of the University City is 365 miles from Indianapolis. Soared on the same maps the New York, A. H. Land Forbee, pilot, which came down within three miles of Corinth, covered 222 miles.

The New York was regarded as the winner, but the final verified reports indicate that the University City went ten or twelve miles in distance. The landing time of the University City is not given.

Fisher Makes Denial.

Fisher denies the stories that the Indiana came to earth to get water.

A telegram to The News from Fisher and Humbaugh, dated Ruskin, Tenn., this morning, says:

"We landed on the William street at Ruskin, Tenn., at 6:30 last evening in a very rough country. We got the machine tied up in a wagon at 10:20 last evening. At 2 o'clock yesterday we were over Centerville, Tenn., but came north in a north-west current, as there were no winds from south. All in good shape, but badly burned."

Fisher at Nashville today said the Indiana only descended to within eight feet of the earth to take on water, but did not touch the ground.

AUGUST 5 IS DATE S
FOR CITY PRIM

TWO MONTHS IN ADVANCE
THE

DECISION OF CIVIL

loon coming down for water will be investigated.

Confusion in Balloons.

By straightening out a confusion in the two St. Louis balloons—the University City and the St. Louis III—the former is shown to have won the long-distance flight record of the national race.

According to reports this morning the St. Louis III, which came down in Lincoln county, Tennessee, at 7 o'clock Sunday evening, was reported as the University City, and that balloon was credited with landing at Blanche, Lincoln county, Tennessee. Late yesterday reports were received from Kelso, in the same Tennessee county, that the St. Louis III had landed there.

It was thought strange, at the time when the landings were being recorded, that the two balloons, after a 330-mile flight, should have landed within ten miles of each other.

This morning, however, reports came in that pilot Berry had landed the University City six miles southeast of Ft. Payne, Ala. This is near Lookout mountain.

Scaled very closely on government maps, the scale of which is supposed to be correct, the landing place of the University City is 365 miles from Indianapolis. Scaled on the same maps the New York, A. Holland Forbes, pilot, which came down within three miles of Corinth, covered 353 miles.

The New York was regarded as the winner, but the final verified reports indicate that the University City beat her ten or twelve miles in distance. The landing time of the University City is not given.

Fisher Makes Denial.

Fisher denies the stories that the Indiana came to earth to get water or sand.

A telegram to The News from Fisher and Bumbaugh, dated Ruskin, Tenn., this morning, says:

"We landed on the William Street farm at Ruskin, Tenn., at 8:30 last evening, in a very rough country. We got the balloon tied up in a wagon at 10:20 last night. At 2 o'clock yesterday we were over Centerville, Tenn., but came north in a north-west current, as there were no winds south. All in good shape, but badly sunburned."

Fisher at Nashville today said the Indiana only descended to within six or eight feet of the earth to take on water, but did not touch the earth.

later the parents noticed that their hopeful seemed to sleep. They watched the carefully and it was about 1 o'clock they detected that the sleep did to be of a natural kind. The limp and in a stupor.

They decided to call Dr. W. Hamson, 1029 West Thirty-first when the physician arrived making inquiries. He examined medicines about the house, and discovered the mistake that made. Some time ago there were in the family, and the morphine were bought at that time. They had been mislaid and were not found when the parents were for the baby's medicine. Dr. W. began working on the baby, but efforts were fruitless. About 4 o'clock morning the child died. The parents almost prostrated with grief. was reported to Coroner Black

AUGUST 5 IS DATE FOR CITY PRIMARIES

TWO MONTHS IN ADVANCE OF THE CITY ELECTIONS

DECISION OF COMMISSIONERS

The city primaries will be held on August 5. This will be ten days in advance of the city elections. The decision was made at a meeting of the city commissioners and the board of election commissioners being Walter T. ... local, John Weaver, Republican, and Clerk James McElvay, who is a member of the board by reason of his office. For weeks the question of a date for the city primaries has been pending and for a long time there was a difference of opinion as to the date.

...with. All in good shape, but badly sun-
burned.

Fisher at Nashville today said the Indiana only descended to within six or eight feet of the earth to take on water, but did not touch the earth and was under perfect control of the operator.

In Air 48 1-2 Hours.

An Associated Press telegram from Nashville says:

"Carl Fisher, pilot of the Indiana, says he had a splendid trip, the weather being delightful until they came near Nashville, when they struck a current of air which carried them to an altitude of fourteen thousand feet, and they had to resort to their overcoats. Mr. Fisher said he did not understand the story that the balloon had landed near Goodlettsville, Tenn., Sunday. The Indiana was in the air 48 1/2 hours. Mr. Fisher left for Indianapolis this morning.

"According to dispatches received here, a bucket was let down from the Indiana near Goodlettsville, Sunday afternoon, and the balloon landed at Ashland City yesterday morning for seven minutes."

The Ashland City "landing," it is asserted, also will be denied by Fisher. It may have been a delay caused by a trailing rope being caught. Such delays up to fifteen minutes are provided for in the rules.

Error Discovered Today

The confusion, which resulted in the University City being reported from Fayetteville, the county seat of Lincoln county, Tennessee, as landing at Blanche, was not discovered until this morning, when A. B. Lambert, pilot, and H. B. Honeywell, assistant of the St. Louis III, arrived in St. Louis and saw the morning papers.

Lambert said to the Associated Press that there had been a confusion of names which led to the false report that the University City had come to earth.

"It was our balloon, the St. Louis III, that landed near Blanche on Sunday," said Mr. Honeywell. "We dropped to earth at the railroad station at Taft, Tenn., two and a half miles from Blanche. We sent our telegrams from Kalso, Tenn. It was Lambert and I who stopped with a farmer of the name of Raunders, not Berry and McCullough, as the reports had it."
