Nine big gas bags are tugging at their guy ropes at the Motor Speedway as though eager for their leap heavenward in the national balloon race this afternoon.

Every aeronaut who will strive for the national prize and honor has arrived. The officials were on the grounds also yesterday.

Charles J. Edwards of New York, who, with Allen Hawley, will have charge of the preliminary work, arrived yesterday and went direct to the speedway. His words of praise for the race course and the complete preparations for aerial flights were those that have been uttered by every visitor.

Charles J. Glidden of Boston, who is the official time keeper, also arrived yesterday. Being an automobile man of international fame as the donor of the Glidden tour trophy, as well as an aeronaut, the Hoosier speedway was a glorious sight to the Easterner. "It excels even the press agent stories," remarked Glidden as he viewed the race course and balloon grounds.

The four St. Louis contestants arrived yesterday, went direct to the grounds and

Weltmer of Nevada, Mo., prominent lecturer on therapeutics, was the speaker at last night's session of the Indiana Association of Suggestive Therapeutics and kept his audience interested with stories of marvelous cures. In his lecture he devoted to answering questions. He discussed the theory of sickness and said no one need be sick because of the rocking of a ship. He said for granted that his audience would go on a trip abroad, and gave them hints on how to prevent sickness. "It makes up your mind that you can change the movements of the ship," he said. "Then put yourself in harmony with the ship. Relax yourself and let your body sway with the swaying of the ship. You will not be sick." He said it was easy to go to sleep, for it is necessary "to keep out of the mind any thought that involves the use of your body."

Old Age From Worry.

Lida W. Hazlett of Richmond said old age and gray hairs come with worry and fretting. She said she did not grow old and did not frown at vexations. "Twenty-eight years ago," she said, "I was ten years older than I do now. I was, if you want to keep your good nature sweeten your disposition." The principal feature of yesterday's session was an address by S. W. Weltmer, a prominent lecturer. He talked on the question of organization. He urged members to keep peace with all the professions. "Investigate all schools of medicine—investigate everything," he said, "and then use the best you can find that will help you in the work of healing." Tomorrow morning the association will hold a business session and this afternoon will adjourn.

YORK SUBWAYS AND TUNNELS TO BE JOINED

City Terminals on Jersey Shore Will Connect With Underground Local Lines.

NEW YORK, June 4. — Underground lines of the Hudson River tunnel system will be joined to the city's subway and with the New York Central and New Haven railroad terminals was practically assured today by the Board of Estimate and Apportionment granted the Hudson & Manhattan Railroad Company's application for a franchise to extend its Sixth avenue tunnel northward from Thirty-third street to Grand Central Station at Forty-second street and Park avenue. The Hudson

every visitor.

Charles J. Glidden of Boston, who is the official time keeper, also arrived yesterday. Being an automobile man of international fame as the donor of the Glidden tour trophy, as well as an aeronaut, the Hoosier speedway was a glorious sight to the Easterner. "It excels even the press agent stories," remarked Glidden as he viewed the race course and balloon grounds.

The four St. Louis contestants arrived yesterday, went direct to the grounds and began preparations for the race. They are John Berry and Paul McCullough, with the University City, and Albert B. Lambert and H. E. Honeywell, with the St. Louis III.

Garbed in characteristic uniforms, the pilots of the sky were busy all yesterday afternoon and late in the night inflating the cloud racers and preparing the equipments in the baskets.

The speedway presented a busy sight as the soldiers of the air armed themselves for the battle against distance and time. Every invention of science and experience is being provided to aid in the flights. Officials of the Aero Club of America rushed here and there answering questions, giving instructions and planning for the start this afternoon.

Balloons of various sizes and colors have sprung from the green grass carpet of the speedway and from a distance present an inspiring view. Dark brown, pure white and different shades of brown and yellow furnish the clew to the identity of the crafts. Before the race starts this afternoon, however, every vessel will be decorated with large flags and pennants.

Guards Protect Balloons.

Every balloon is in perfect condition, having run the risk of damage in shipment successfully. Guards were stationed around the big bags all night to protect them as the gas poured in a continuous stream into the necks of the several vessels.

The all-absorbing question now with both participant and spectators as well as millions the country over is the direction the wind will carry the racers.

Maj. H. B. Hersey, the United States weather expert from Washington, and W. T. Blythe, the local official, spent all day yesterday making a study of the indications. Special telegram reports were received until late in the night from Cleveland, Columbus and Toledo.

The value of an understanding of the weather conditions on the part of a pilot can not be overestimated according to Hersey. "The wind is the motor for this kind of a balloon," he said, "and as in the case of an automobile the driver should know all about his motor power."

you in the work of healing." Morning the association will hold a session and this afternoon will

YORK SUBWAYS AND TUNNELS TO BE JOINED

Terminals on Jersey Shore Will Connect With Underground Local Lines.

YORK, June 4.—Underground of the Hudson River tunnel system a city's subway and with the New Central and New Haven railroad was practically assured today the Board of Estimate and Appor- granted the Hudson & Manhat- road Company's application for a e to extend its Sixth avenue tun- ward from Thirty-third street to and Central Station at Forty-second and Park avenue. The Hudson tunnels as thus extended will afford connections between the great terminals on the New Jersey side Hudson and the important railroad and underground traffic routes on an Island. William McAdoo, head Hudson & Manhattan system, said that his company expected to be passengers from Forty-second New Jersey within two years.

LEY MYSTERY UNSOLVED.

Police Arrest Suspect, but Later Release Him.

AGO, June 4.—The police today no progress in solving the mystery ng the death of Dr. John T. Hr. of Evansville, Ind., who was ead in his room at the Wellington Wednesday. One man, who was to have been heard telling an e of the hotel of "easy money," eated, but later was released. body of Dr. Binkley was taken to etown, Ill., his old home, for burial

oon, however, every vessel was orated with large flags and pennants.

Guards Protect Balloons.

Every balloon is in perfect condition, having run the risk of damage in ship- ment successfully. Guards were stationed around the big bags all night to protect them as the gas poured in a continuous stream into the necks of the several vessels.

The all-absorbing question now with both participant and spectators as well as millions the country over is the di- rection the wind will carry the racers.

Maj. H. B. Hersey, the United States weather expert from Washington, and W. T. Blythe, the local official, spent all day yesterday making a study of the in- dications. Special telegram reports were received until late in the night from Cleveland, Columbus and Toledo.

The value of an understanding of the weather conditions on the part of a pilot can not be overestimated according to Hersey. "The wind is the motor for this kind of a balloon," he said, "and as in the case of an automobile the driver should know all about his motor power."

The pilots hope for a wind toward the northeast. This is what they desire near the surface, for if an ascension is made high enough it is said to be certain that an easterly wind will be found. There is danger from the loss of gas, however, in risking high exploring soars, and this often restrains the pilots from the at- tempt.

A wind direct to the east would carry the flyers to the ocean and thus cut short what might be a world record-breaking trip. With a breeze near the surface to- ward the northeast, the dream of all pilots, there is no limit to the distance possible. Every craft will be provided with both maps of the earth below and the air around and above.

As roads are the all-important thing to race events on the earth's roadways, this same factor is the key to successful races in the invisible paths of the sky.

Speculate on Winner.

Speculations as to who will win the long- distance glide honor are heard on every side. The world's record for the longest suspension in the air is held by a Swiss balloon, Helvetia, piloted by Col. Schaeck, having remained up for seventy-three hours at the James Gordon Bennett race in Germany Oct. 12 last year. It traveled 140 miles. The Pommern holds the United States honor, having traveled last year from St. Louis to New Jersey.

According to the preparations of some of the pilots who will rise and start their air crusade this afternoon all former records will disappear.

Over with his 110,000-foot capacity balloon, Schaeck, made well to travel a long distance. He is in the handicap race, but judges are that he will give some of the racers in the national race a stiff run. He is out of this in

you in the work of healing." Morning the association will hold a session and this afternoon will

often restrain the pilot from the attempt.

A wind direct to the east would carry the flyers to the ocean and thus cut short what might be a world record-breaking trip. With a breeze near the surface toward the northeast, the dream of all pilots, there is no limit to the distance possible. Every craft will be provided with both maps of the earth below and the air around and above.

As roads are the all-important thing to race events on the earth's roadways, this same factor is the key to successful races in the invisible paths of the sky.

Speculate on Winner.

Speculations as to who will win the long-distance glide honor are heard on every side. The world's record for the longest suspension in the air is held by a Swiss balloon, Helvetia, piloted by Col. Schaeck, having remained up for seventy-three hours at the James Gordon Bennett race in Germany Oct. 12 last year. It traveled 750 miles. The Pommern holds the United States honor, having traveled last year from St. Louis to New Jersey.

According to the preparations of some of the pilots who will rise and start their air crusade this afternoon all former records will diminish.

Coe, with his 110,000-foot capacity balloon, Chicago, bids well to travel a long distance. He is in the handicap race, but predictions are that he will give some of the entrants in the national race a close run. He is not eligible in the big race, because of the size of his balloon, which is the largest in the world. When inflated and is reared in the air with basket ropes suspended the Chicago stands as high as an eight-story building.

A. Holland Forbes of New York, who will fly with Capt. Harmon in the New York, remains at the head of the predicted list of winners in the national event. His special balloon material gives him a big advantage over his competitors.

The spirits of all the men are high, and to the observer, as they work with electric bands with nets and canvas, it appears as though they were preparing for a great game in the clouds.

Women Express Fear.

A common question asked on every hand by curious observers of the pilots and their wives is "When will they be frightened to death?" Women especially display an alarming amount of nervousness concerning the welfare of their men.

But all agree that ballooning is not as dangerous as flying in an airplane.

CONCLUDED FROM PAGE ONE.

on a train. With an experienced pilot they maintain that they are safer than if they were riding on a street car.

As an example, Maj. Hersey cites the Aero Club of France, which has a long list of members, and says that out of more than 9,000 ascensions there has been but one accident.

Charles J. Glidden, who represents the Aero Club of New England, is an international pilot, holding certificates from the Aero Clubs of France, America and New England. He has made twenty-eight ascensions—three in France, four in England and twenty-one in Massachusetts. Speaking of aeronautics Mr. Glidden said that great interest is taken by members of the clubs located in the New England states. There are active clubs at Hartford, Conn.; Pittsfield, Mass.; North Adams, Springfield, Worcester and Boston. The clubs own seven balloons, two of 56,000 cubic feet capacity and five of 35,000 cubic feet. Ascensions are averaging one daily. Aero parks have been established at Pittsfield, North Adams, Springfield, Fitchburg, Lowell and Nashua. Ascensions can be arranged for on one hour's notice. There are skilled pilots, members of the clubs, at Pittsfield, North Adams, Springfield and Boston. Prominent business and professional men are making ascensions.

Valuable trophies have been offered for landing in certain localities. Any contestant in the national race landing on the Island of Montreal in Canada will receive the trophies offered by the Automobile Club of Canada and Lapatrie.

Hawley Instructs Pilots.

A final school of instruction was held last night and the pilots were given expert advice by Allen Hawley of New York. A pilot has something to do other than look around and feast on the beautiful scenery. He is required to keep a tabulated account every minute of the journey of his altitude and other conditions. Certificates must be filled out immediately after landing, to which witnesses must sign their names, these to be delivered at once to the national officers.

The "wireless" blanks which will be dropped overboard to inform the public of the direction and condition of the racers are printed in English, German and French languages. Several questions are

MAGNATES DECIDE TO DE- NITE ACTION OF REMOVING OF LEAGUE UNTIL SOM- TURE SESSION.

CINCINNATI, O., June 4. ing in session practically all noon and till past midnight directors of the National Base deferred until some future definite action regarding Harry C. Pulliam of the league at present on indefinite leave. The statement was made that Pulliam had a sufficient votes among the directors to return to the presidency in sense if it can be shown that covered from the illness from was suffering when he was leave of absence.

The decision of Acting Pre Heydler in the matter of the Cincinnati game of April 23 was by the directors by a vote taken night and it was ordered that be played off in Pittsburg on

at once to the national officers.
The "wireless" blanks which will be
dropped overboard to inform the public
of the direction and condition of the rac-
ers are printed in English, German and
French languages. Several questions are
asked, which the finder is requested to
answer and send by wire to The Indianap-
olis Star.

Mrs. Charles Coey refuses to let her un-
easiness concerning her husband's danger
manifest itself. She said last night that
being a woman she felt considerable ap-
prehension. She encourages him, how-
ever, and believes that he is sure of suc-
cess. Mr. Coey's sister and other rela-
tives are in the city to witness the start.

Several of the relatives of the aeronauts
are expected by this afternoon to bid a
last farewell to the flyers before the leap
toward the clouds.

Remaining several hours, day after day,
in a small basket four feet square is
said to tax the nerves of the strongest
man to the limit. There is no escape
other than death. It is impossible to
step outside and walk around a while to
rest, thus the trip is filled with hardships
that stare the contestants in the face.

H. B. Lamber, who will fly in the St.
Louis, has the only air blower that will
be in use. It is an experiment. It
furnishes 20,000 cubic feet of air in an
hour. The purpose of the machine is in
case considerable gas has escaped to pour
air inside the bag, thus keeping the vessel
strengthened.

Dr. Charles Fielding of San Antonio,
Tex., who made such a thrilling ascen-
sion the last Fourth of July at Chicago,
is among the latest arrivals to witness
the performances.

Pin Faith to Locals.

All eyes are on the Hoosier city today
and millions over the land will be on the
alert for a sight of the big balloons.

From a thousand places they will ex-
amine weather vanes during the day, fig-
uring on the chances of the sky-crafts
sailing their way after they float from
their moorings at the Speedway.

The locals pin their faith in Fisher.
Certainly no one in the race has more
nerve than the Indianapolis aeronaut and
it would not surprise any one to read
from the messages sent that Fisher and
Rumbaugh had cut loose their basket and
fall equipment in order to remain in the
air until the last minute.

Coey states that he will also resort to
such an effort to win, and with men de-
termined to risk their lives in order to
win the limit of flight, there is no tell-
ing what the actual result will be.

If the sea is found to be the destination
of the flyers, although to land in water
is to destroy the balloons from winging
the journey, yet a few of the aeronauts
are willing to surrender the cup to make
the longest flight.

ered at once to the national officers.
The "wireless" blanks which will be
dropped overboard to inform the public
of the direction and condition of the rac-
ers are printed in English, German and
French languages. Several questions are
asked, which the finder is requested to
answer and send by wire to The Indianap-
olis Star.

Mrs. Charles Coey refuses to let her un-
easiness concerning her husband's danger
manifest itself. She said last night that
being a woman she felt considerable ap-
prehension. She encourages him, how-
ever, and believes that he is sure of suc-
cess. Mr. Coey's sister and other rela-
tives are in the city to witness the start.

Several of the relatives of the aeronauts
are expected by this afternoon to bid a
last farewell to the flyers before the leap
toward the clouds.

Remaining several hours, day after day,
in a small basket four feet square is
said to tax the nerves of the strongest
man to the limit. There is no escape
other than death. It is impossible to
step outside and walk around a while to
rest, thus the trip is filled with hardships
that stare the contestants in the face.

H. B. Lamber, who will fly in the St.
Louis, has the only air blower that will
be in use. It is an experiment. It
furnishes 20,000 cubic feet of air in an
hour. The purpose of the machine is in
case considerable gas has escaped to pour
air inside the bag, thus keeping the vessel
strengthened.

Dr. Charles Fielding of San Antonio,
Tex., who made such a thrilling ascen-
sion the last Fourth of July at Chicago,
is among the latest arrivals to witness
the performances.

Pin Faith to Locals.

All eyes are on the Hoosier city today
and millions over the land will be on the
alert for a sight of the big balloons.

From a thousand places they will ex-
amine weather vanes during the day, fig-
uring on the chances of the sky crafts
sailing their way after they float from
their moorings at the Speedway.

The locals pin their faith in Fisher.
Certainly no one in the race has more
nerve than the Indianapolis aeronaut and
it would not surprise any one to read
from the messages sent that Fisher and
Bumbaugh had cut loose their basket and
full equipment in order to remain in the
air until the last minute.

Coey states that he will also resort to
such an effort to win, and with men de-
termined to risk their lives in order to
reach the limit of flight, there is no tell-
ing what the actual result will be.

If the sea is bound to be the destination
of the flyers, although to land in water
is to disqualify the balloon from winning
the trophy, yet a few of the aeronauts
are willing to sacrifice the cup to make
the longest flight.
