

# GETTING FARTHER AND FARTHER FROM HOME

BALLOON STARTS FOR DAYTON,  
FLIES DOWN IN KENTUCKY.

TIES UP A TRACTION LINE

Henry D. Pruden, of Dayton, O., came to this city a few days ago and bought of George L. Bumbaugh the balloon Indiana, just for his own amusement. Pruden is sixty years of age and rich.

Yesterday afternoon the balloon was inflated at the speedway, and Pruden, who was in the basket with H. H. McGill, of Dayton, started, as he hoped, for home. The Indians started south and reports received today showed that Pruden and McGill were farther from home than when they started yesterday. The balloon's anchor caught in a trolley wire of the Indianapolis, Columbus & Southern Traction Company, near Columbus, and broke it, tying up traffic for several hours. Dispatches today showed that the balloon had entered Kentucky and that it was still going.

## Bumbaugh-Fisher Trip Recalled.

The balloon Indiana is practically new. It was made by Bumbaugh and used for the first time during the balloon races at the speedway several months ago. It carried Bumbaugh and Fisher on one of the most remarkable balloon trips ever made. After spending two days and nights in the air, the aeronauts were forced to come to the ground and get fresh water. They anchored to a tree, and after filling their water vessels they again went aloft and floated about over the state of Tennessee for another day and night. The anchoring of the balloon to the ground and alighting disqualified Bumbaugh and Fisher from making a world's record. Pruden is an enthusiastic

## ANCHOR CATCHES WIRE.

### Balloon in Indiana Ties Up Traction Line for Hours

[Special to The Indianapolis News.]

COLUMBUS, Ind., October 1.—An unknown balloon carrying two men struck the high tension wires of the Indianapolis, Columbus & Southern Traction Company, about eight miles north of this city at 8 o'clock last night. The high tension wire, carrying five thousand volts of electricity, was snapped and the machinery in the power house at Edinburg was damaged to some extent and every passenger car on the south end of the line was tied up until late at night. The accident was caused by the trailing anchor from the balloon. The traction company officials will sue the owner of the balloon for damages.

At Taylorsville, near here, the balloon was so low that the men in it conversed with residents in the town. They inquired their position and explained to some of them that they were from Chicago, but gave no names nor the name of the balloon. After throwing out ballast near Taylorsville, they rose rapidly and disappeared from view.

### Those Roo

The Tacoma Chamber of Commerce will entertain the President for Portland, at 10 o'clock this morning.

President Taft spent the night in the Washington hotel, the world's fair, which was attended by five hundred people. Referring to Secretary Taft, the President said: "I am sorry for coming into my office and testifying in the presence of my neighbors to the situation in which I hold my office."

### Those Roo

Mr. Taft took it for granted that the administration would out the Roosevelt policies. He is bound to admit that he has knowledge of the situation. He loved it better than any other in the east; but I have served in the cabinet four years with the determination to carry out Roosevelt policies.

"No one can have a more grateful feeling than I have. There is nothing to justify what the President has done. We have heard of the Pope. Occasional men so earnest in their support of Roosevelt policies that they are more zealous than Roosevelt himself. I have done the best I can for Roosevelt policies, and as I was in the cabinet for four years I had at least some knowledge of what they were doing."

The exposition is a success. The President's gate receipts to be the highest they were since the inauguration. It is expected that the fourth day, since the first day was the best, the second and third days will be equally successful.

### Heard the

The President's ship subsidy bill is a success. The ship subsidy bill is a success.
