

Builds Cloud Racers in His Dwelling for National Event.

"BALLOON FACTORY" OF G. L. BUMBAUGH.

Dreams of the day when Indianapolis could witness a race in the clouds seem about to be realized.

The nine entries for the national balloon race to be held here June 5 under the auspices of the Aero Club of America assure success.

The quarter of a million dollar motor speedway, six miles northwest of the Hoosier capital offers and ideal location

from which the aeronauts can ascend. There are no large bodies of water near Indianapolis, which guarantees safety to the flyers from that danger.

Thousands of persons are expected to flock to this city during the cloud events, which are scheduled to break all similar events recorded thus far in the world's progress.

One of the four balloon factories in this country is located in Indianapolis. Not

more than a dozen citizens are said to be aware of this fact.

Even the neighbors who live within a stone's throw of the factory pass it daily without the knowledge that night and day busy aeronauts ply their trade. Capt. G. L. Bumbaugh and wife, assisted by an old sailor, compose the group of "factory hands," and the "shop" is their residence, 1025 North Illinois street. Four rooms of this dwelling are devoted to making cloud

ships. The walls are covered with materials and the floors are piled high with hundreds of yards of canvas. Electric machines are operated for sewing purposes.

Within ten days Bumbaugh hopes to have his new quarters completed at the speedway tracks, where he will hereafter do his varnishing. He prides himself on leading the world in making perfect spheres.

WRIGHT BROTHERS MAY EXHIBIT FLYING MACHINE AT AUTO SPEEDWAY OPENING

Have you bought an airship yet?

That may be a common question in a few more years, and in an effort to make it so the Wright brothers will begin manufacturing them for commercial purposes in a few more months. Already they
