CHICAGO, July 18.—Russell Ford, once in the limelight as a spitball star for the Yankees, and a boxer whose appliance of emery to the horsehide gained him many victories, has been drafted up again in the national pastime, but this time not with a club associated with organized baseball. When the Feds first started their campaign against organized baseball, a few years ago, Ford "jumped" the Yankees to play with the Buffalo Bisons. Later he was released, and since then has been "among the missing."

AT THE TEE

The Bogey philosopher wishes to know how long it takes a handicapper to become a scratch player. He wonders if he will ever have the opportunity to see par playing around the course with him. Talk about funny, why the best joke that ever occurred out at municipal links happened yesterday. No one was asked to pay an entrance fee. It happened this way: A very pretty girl who was evidently unaccustomed to the royal and ancient game seated herself on the bench that is parallel with the tee box. Soon two golfers came along and they decided to play another round. So one took up the ball on the same bench that the girl was sitting on. The swatsman on the teeing ground drove and his partner looked up as he heard the crack of the club on the golf ball, and he was heard to say, "Gee, she's a peach."

ETIQUETTE IN MEXICO

Travelers through Mexico report many peculiar customs which reflect the temperamental character of these people. Some of these are founded upon superstitions hundreds of years old while others date from more recent days. There is a prevailing belief in the country that there is bad luck in a sequence of three, and wherever possible the combination of three is avoided. This is shown very often to persons strange to the land in the lighting of a cigarette.

RED MEN WILL SAVE FOOD

Ask for Expert to Teach Squaws How to Save Wheat by Using Substitutes. OMAHA, Neb.—Indians are not white behind the white man when it comes to conservation. They are only sent their boys to fight for Uncle Sam, but they want to do their bit at home.

Shippers were told by Director Sanders that the line needs annually about 1,250,000 tons of southbound freight, and an equal amount northbound to make it successful.

THE RIGHT SPIRIT

President John Greer Hibben, of Princeton, said the other day: "It costs \$10,000 to make an airman, and no airman should be foolishly reckless for his country can't afford to lose him."

TRAITORS OF BIRD LOVERS

Years ago, during a winter's visit in London, I used to watch the persons who regularly fed the birds in Hyde park. I noticed that most of them were people of apparent high social circumstances, a few pretty close to understanding themselves. It was delightful to see how much pleasure they all took in keeping these birds from hunger.

INSISTS ON TOO MUCH

The trouble with the man who blows his own horn is that he so often insists on being the whole orfaster.

PAPER FABRICS IN NORWAY

The Nydalen company, one of Norway's leading textile manufacturers, has for some time been experimenting with paper textiles, and the results have been so good that its factory will soon produce these new fabrics on a large scale, according to a commercial report from Copenhagen. They consist of 75 per cent paper and 25 per cent cotton and are said to be soft and warm; a little heavier than ordinary cotton goods and not quite so strong, but cheaper. They should be especially suited to a starting question for blouses, dresses, curtains, and, in short, as a substitute for cotton goods in general.

ODD CURE FOR DEAFNESS

There have been recorded many cases of deafness and speechlessness being cured by accidental means, such as a sudden noise or an unexpected visitor, or a startling question asked in one case at a midnight fall out of bed. But one of the strangest cases belongs to a former war, where a soldier lay for fifteen months under the influence of cataplexy. Finally, in despair, the doctors ordered the hypnosis to be played near the patient's bed. That did the work.

RED HEADS SELDOM BALD

The reason why red-haired people are less subject to baldness than others is said to be this: Their hair is relatively thick, one red hair being almost as thick as five fair or three brown hairs. The consequence is that with 30,000 red hairs the scalp is well thatched; whereas with the same number of fair hairs one is comparatively bald.

JUST HIS LITTLE MISTAKE

Of Course Soldier Could Not Be Blamed, But It Was an Unfortunate Error. The anonymous author of "Nursing Adventures," tells an amusing story of a soldier brother of hers who came to crave her hospitality for a brief period at a clearing hospital "somewhere in France."

AUTO MEN DECLARE THEY FACE DISASTER

WASHINGTON, D. C., July 18.—Automobile manufacturers, it became known on Wednesday, had a lively session with the war industries board at their conference on Tuesday, at which curtailment of passenger car production was discussed and the board called on the manufacturers to submit within two weeks a sworn inventory of steel and steel products now on hand. Men who participated in the conference said that it has been a long one in which the automobile manufacturers predicted a dire outcome unless the director of steel supply grants to the passenger car makers enough steel to enable them to liquidate their present inventories.
