

INDIANAPOLIS BALLOONS FINAL HOME SERIES IN ST. LOUIS RACES FLAG FOR THE C

BIG SPEED CONTEST TO BE
STARTED NEXT MONDAY.

INDIANAPOLIS WINNER LOST

(Special to The Indianapolis News.)

ST. LOUIS, September 28.—When not fewer than a dozen spherical balloons, large and small, race away from St. Louis at 4 o'clock in the afternoon of Monday, October 4, the second day of the city's centennial celebration, the greatest event of its kind ever held, will have begun.

An interesting feature of this race which will be but one in the series of elaborate aerial and other events that will crowd centennial week, October 1 to 8, will be the variety in the size of the balloons. The larger number probably will be of 78,000 cubic feet capacity, the maximum size allowed by the rules, but others will be of much smaller capacity.

The Missouri, which is owned by the Aero Club of St. Louis, has but 20,000 cubic feet capacity, and probably will be piloted by Albert Bond Lambert, millionaire St. Louis manufacturer, who is one of the most noted aeronauts in America. Tony von Puhl, St. Louis clubman, who recently qualified for a pilot's license, has applied to the club for permission to pilot its St. Louis III, of 78,000 cubic feet capacity, and likely will be allowed to do so. A new balloon, the Centennial (78,000 cubic feet), which is being manufactured by H. E. Honeywell, will be piloted by him.

Indianapolis Winner Destroyed.

John Berry, American champion balloonist, is expected to be in the race. His

1,000 FEET A. B. competition and a half-minute ago a series of explosions filled the air, followed closely by a long 100-grain cannonade of Armstrong shells. The grand finale of the balloon races. Then there had been the steady drum of a gun, coming like a regular well-supported, well-established, well-trained, well-aimed battery, and now came another. The gunners had already adjusted the range, and the gun was "on" and a series of reports told every one that the gun had been made ready for another discharge, and another. It happened to be the last gun of the balloon races.

It was 10 minutes' interval, and that seemed many a good day that the gun had been made ready for another discharge, and another. It happened to be the last gun of the balloon races.

FINAL HOME SERIES FLAG FOR THE C

FIFTEEN OUT OF LAST FIVE GAMES VICTORIOUS

INDIANS GAVE ASSIST

LOUISVILLE, September 28.—(UPI)—and a half months ago a team of athletes, under the leadership of veteran catcher Heinie Pfeiffer, long 163-game schedule of the Association. It was a propitious beginning, for the Colonels won their first five games of the season. Then they had weeks of vicissitudes, one time being on top, the next steadily until for a time they were among the also-rans. But the team was well balanced, with good pitching, excellent leadership. Pfeiffer, a player, and saw that all were effective. He disposed of a large quantity on the mound, ably assisted by Orville Womack, Puttman and Peter D.

It was Woodruff's arm-breaking that saved many a game. Deny that he has any right to be a fielder in the big leagues, and he has been most valuable for every batsman and every outfielder. By bat, he happens to be directly to the left of the batsman hits.

Louisville's grand rally, giving the team the championship, upon its return from the trip. The team won nine games, despite its criticism of the last swing through Cincinnati and Indianapolis, and returned to park to play four games, breaking even with the lead.

INDIANAPOLIS WINNER LOST CUP

Special to The Indianapolis News

ST. LOUIS, September 21.—With but few than a dozen spherical balloons, large and small, race away from St. Louis at 4 o'clock in the afternoon of Monday, October 4, the second day of the city's centennial celebration, the greatest balloon race of its kind ever held, will have begun.

An interesting feature of the race, which will be but one in the series of elaborate aerial and other events that will crowd centennial week, October 1 to 9, will be the variety in the size of the balloons. The larger number probably will be of 78,000 cubic feet capacity, the maximum size allowed by the rules, but others will be of much smaller capacity.

The Missouri, which is owned by the Aero Club of St. Louis, has but 30,000 cubic feet capacity, and probably will be piloted by Albert Bond Lathrop, millionaire St. Louis manufacturer, who is one of the most noted aeronauts in America. Tony von Puhl, St. Louis aviator, who recently qualified for a pilot's license, has applied to the club for permission to pilot its St. Louis III, of 16,000 cubic feet capacity, and likely will be allowed to do so. A new balloon, the Centennial, (10,000 cubic feet), which is being manufactured by H. E. Honeywell, will be piloted by him.

him.

Indianapolis Winner Destroyed.

John Berry, American champion balloonist, is expected to be in the race, but visitors will not see the remarkable University City in which he won the national race which started recently from Indianapolis. This balloon, which was one of the oldest in St. Louis, and formerly was named the Yankee, went to pieces in a stiff wind as Berry was preparing to make a flight in it in the last week of August. The ease with which the netting was torn from the great bag disclosed how perilous had been Berry's long championship flight.

One woman was in the party of five who were preparing to ascend when the collapse came, and to the fact that the balloon gave away to the buffeting of the wind before rather than after the start all probably owe their lives. Berry probably will be seen in his last flight centennial week, as he has announced an intention of giving up ballooning, in which he is a veteran, that he may devote his entire attention to his business.

Among the others who have promised to have balloons in the race is A. H. Leffland Forbes of New York, acting president of the Aero Club of America, who is expected to pilot the bag he sends. The Indianapolis club has said it will have a couple of balloons in the contest, and the most probable pilots of these are G. L. Wimbaugh and Carl Fisher, who were in the recent national event. The races will start from the new grounds of the Aero Club of St. Louis, at Laclede avenue near Forest park.

An hour before the time of the big race, another will be started for small balloons, of a maximum capacity of forty thousand cubic feet.

Curtiss an Attraction.

Aside from the spherical balloon races the centennial association has well made way arrangements for great airtight and aeroplane contests and exhibitions, to be held on separate days. The entrants for the aeroplane races include Glenn H. Curtiss, winner of the recent international aeroplane tournament at Reims, France, and hence champion aviator of the world. The entrants for the airtight (dirigible balloon) race, include ~~Baldwin~~ Baldwin and Knabenshue.

MOTORCYCLE RACES STOPPED

Indianapolis Winner Destroyed.

John Berry, American champion balloonist, is expected to be in the race, but visitors will not see the remarkable University City in which he won the national race which started recently from Indianapolis. This balloon, which was one of the best in St. Louis, and formerly was used by the Yankee, went to pieces in a gale wind as Berry was preparing to make a flight in it. In the last week of August, the case with which the netting had been taken from the great bag disclosed that the gondola had been Berry's longcherished flight.

This balloon was in the party of five who were preparing to ascend when the balloon came down, and to the fact that the balloon was away to the bursting of the gas bag rather than after the start all probably owe their lives. Berry probably will not be seen in his last flight continental race, as he has announced an intention of giving up ballooning, in which he is a veteran, that he may devote his entire attention to his business.

Among the others who have promised to take balloons in the race is A. Holland Forbes of New York, acting president of the Aero Club of America, who is expected to pilot the bag he sends. The Indianapolis club has said it will have a number of balloons in the contest, and the most probable pilots of these are G. L. Knabenshue and Carl Fisher, who were in the recent national event. The races will start from the new grounds of the Aerodrome of St. Louis, at Laclede avenue, near Forest Park.

An hour before the time of the big race another will be started for small balloons of a maximum capacity of forty thousand cubic feet.

Copters an Attraction.

Aids from the spherical balloon races, the continental association has well under way arrangements for great airship and aeroplane contests and exhibitions, to be held on separate days. The entrants for the aeroplane races include Glenn H. Curtiss, winner of the recent international aeroplane tournament at Rheims, France, and hence champion aviator of the world. The entrants for the airship (dirigible balloon) race, include MacReady, Balloons and Knabenshue.

gained, despite the last swing through Chicago, and returned to our games with the Mud

Indians

With but nine games left September 18 the Indians go to Louisville to start series. Milwaukee won 10-1 over Milwaukee by seven full games, led by three and a half. The Milwaukee never-to-be-forgotten less tie, in which Indians against young then won four out of Milwaukee, while the Milwaukees left here their seven-game record cut to four games.

Minneapolis came to Louisville to the Colonels by three games. Colonels took four out of the Colonels' team and passed while Charley Morris' champions helped taking four Milwaukee. This lead to one game, and the Colonels four days, passing Milwaukee. counterbalanced final St. Paul Colonels finished regular by taking three out of the City. This grand series was taken fifteen victories, gave Pettit's fine good, safe margin.

Will Play Sunday

Last night the players were by local authorities on Thursday afternoon they will be with a local club on Tuesday night. Owner William St. Louis broker from George T. Bachman will Tuesday's manager a new outfit besides the horses which they will the park.
