her own screws and proceeded on her voyage. She carried 426 passengers, all of whom remained on board.

AUTOMOBILE ROAD FROM THIS CITY TO CHICAGO

COMPANY TO BUILD IT HAS BEEN
ORGANIZED.

WORK WILL BEGIN SOON

Charles S. Hernly, of Newcastle, former Republican State chairman, announced today that a company would be incorporated in Indiana next week to build an automobile highway between Indianapolis and Chicago.

"The preliminary papers," said he, "are being signed this week. The company will be organized with \$250,000 capital stock as a beginner. Carl Fisher, of Indianapolis, and Ben Briscoe, of Tarrytown, N. Y., president of the Maxwell-Briscoe Motor Company, are associated with me in this project. There are others, but I can not announce their names this week.

"We propose to build a great highway for automobilists between the two cities. It will be a finely graded road, built as railroads, on a private right-of-way, and it will be oiled and kept in as fine condition as any city speedway. It will be open to automobile owners and the toll will be 1 cent a mile.

To Begin Work This Summer.

"We intend to begin the construction this summer and get twenty-five or thirty miles of it ready for use by early fall. The work of getting the right-of-way will begin as soon as we file our articles of incorporation next week. We have men whose names will be sufficient guaranty that the highway will be built.

"We have three routes in mind at this time. We don't, of course, want to give them definitely, but one is by Lebanon and Frankfort, another by Crawfordsville and Lafayette, and the third by Noblesville, Tipton and Logansport."

He was asked if the report that the

diction as any city speedway. It will be
open to automobile owners and the toll
will be 1 cent a mile.

To Begin Work This Summer.

"We intend to begin the construction
this summer and get twenty-five or thirty
miles of it ready for use by early
fall. The work of getting the right-of-
way will begin as soon as we file our
articles of incorporation next week. We
have men whose names will be sufficient
guaranty that the highway will be built.

"We have three routes in mind at this
time. We don't, of course, want to give
them definitely, but one is by Lebanon
and Frankfort, another by Crawfords-
ville and Lafayette, and the third by No-
blesville, Tipton and Logansport."

He was asked if the report that the
company also intended to establish a
through regular passenger service of cars
between Indianapolis and Chicago is cor-
rect.

"There is nothing in that. It will be just
an auto road open to all automobile own-
ers who will pay the toll. It is the first
big project of the kind in this country
to take definite shape, and we propose to
make it a reality from Indianapolis to
Chicago by next year. A good start will
be made this summer and fall."

Will Cost Nearly \$2,000,000.

The estimates for the construction of
the entire highway, which will be approx-
imately 200 miles, are not made public.
It is understood, however, that the esti-
mates are between \$1,500,000 and \$2,000,000.

The toll, which is announced, will be
\$2 for the use of the speedway between
the two cities, or \$4 round trip. It is
thought that the pleasure seekers alone
would keep the road so full that a big
return would be assured on the invest-
ment. The new Indianapolis speedway
and the big boulevard system of Chicago
would be exceptional terminal attrac-
tions for such an undertaking.

It was announced that the roadway
will be kept in such condition that it
"won't be any trick at all" for a man
with a high power machine to make the
railroad time of approximately five hours
between the two cities "look like a snail's
schedule."

The roadway, as planned, is to be wide
enough so that there will be no danger
to the "slow pokes" when owners of high
power machines let them out.

"We will file our incorporation papers
next week," said Hernly, "and will then
be ready to talk about the details of the
undertaking."

The shares of stock will be \$100, and
Hernly announced that this will be placed
with automobile people. In this way they
will be made interested in the success
of the undertaking.
