

# STODDARD-DAYTON \$2250

## Point Its Nose to the Sky and SOAR

THE STODDARD-DAYTON is an Alpine wonder when it comes to climbing. The way it hoists its hood toward the hilltop, buckles-to and takes the up-grade is a positive delight.

There's no strain about it. The car was built for performances of just that sort.

For every sixty pounds of weight there's one horse drawing power—30-35 in all.

That's the reason it is a pleasure to take to the hills in a STODDARD-DAYTON—Maximum power and minimum weight.

To the enthusiastic motorist who does not have to be introduced to telling features in car construction the selective type transmission is a never ending source of satisfaction.

And talking of speed—in the recent Ormond Beach, Florida, races, an ordinary stock Stoddard-Dayton Model D, driven by an amateur, ran 15 miles in 17 minutes, finishing second and beating all other gasoline cars in the 15-mile Amateur Handicap event.

The usual crashing that ordinarily accompanies a change of speed is overcome. Cause—separation of the sliding gear enables the operator to pass from one speed to another without going through any gears.

The STODDARD-DAYTON is always under control. An emergency brake enables it to be stopped on the instant. That's a point not to be overlooked. Both foot and emergency brakes are interconnected with the clutch. The application of either releases the clutch and throttles the motor. That's safety—doubly insured.

### STODDARD-DAYTON Model D "As good as it looks."

This 5-passenger Touring Car is equipped with a special type of 4½x5-inch 4-cylinder, water-cooled motor; hot rolled, high carbon, pressed steel frame; perfect mechanical lubrication; roller bearings for transmission. Change from high to intermediate, or vice versa, at speed of 25 miles, uphill or down. A practically noiseless car, \$2,250.

Send for catalog—it's full of information interesting to motor folks.

Poor scores characterized the work of the members of the Commercial Bowling League in their last efforts of the season of 1905-06 last night. The Burford's are

Frank Gotch, America's champion wrestler, who meets Sam Murbarger in this city on Thursday night at Tomlinson Hall in a handicap match, Gotch agreeing to throw the local man three times within an hour, will arrive in this city this afternoon from Montreal and will be at the Denison Hotel during his stay here.

The match in this city is looked upon in sporting circles as one of the greatest of the year, as it is the first time that Gotch has agreed to any such match. Gotch will be restricted some by the articles of agreement, as several of his favorite holds have been barred. Murbarger is in great shape for the bout and declares that he will

## PELVIC DISEASES OF MEN

Expert Ability Is Now Demanded in Almost Every Vocation, and It Is Especially Demanded When Life or Health Is at Stake. The Field of Medicine and Surgery Has Been Divided and Subdivided Into Various Branches, and the Physician Who Becomes Supreme in Any Particular Branch Must Conscientiously Confine Himself to That Branch.

Our well-known offices are conducted solely for the cure of MALE PELVIC DISEASES. Moderate charges, fair dealing, faithful service and speedy cures are responsible for our large practice.
