## BUILD MOTOR BOATS

### LOCAL MEN MAKING BIG HULLS

Fisher and Pierce of Indiana Club  
Enter One of Their Machines  
in Big Races.

That Indianapolis is to be a city noted for its motor boat racing and motor boat building now seems about to be a reality. Despite the fact that it is an inland town motor racing has become very popular here. The enthusiastic followers of the game have been organized for some time and now are known as the Indiana Motor Club. Its members are not limited to motor boat and launch owners, as about half of the two hundred members are autolists. However, the clubmen now have over forty launches at Broad Ripple and this number is being rapidly increased, the new arrivals including many fast hulls.

Carl G. Fisher of the Fisher Automobile Company and Bert N. Pierce, secretary of the Indiana Motor Club, are now building motor boats which are equal to the highest standards in the country.

JAMES S.

Probably the most daring of the steeplechase riders of the country is Harry S. Page. In the upper picture he is shown driving Pure Pepper to victory, and the lower one shows him training a horse at Hempstead, L. I.

## UMPIRE OWENS IS ILL

### STRAIN OF ATTACKS TOO MUCH

President O'Brien Is Aroused and  
Says Somebody's Head  
Shall Fall.

MILWAUKEE, Wis., July 30.—President O'Brien of the American Association has called a meeting of directors and club owners to be held in Chicago tomorrow to investigate the charges against Umpire Owens which accuse him of betting on a game in Minneapolis which was lost to Columbus. President Havenor of the Milwaukee club will not attend and it is probable that another director will be absent, but their proxies will be voted by a third member of the board. President O'Brien spoke in a guarded manner of the meeting, but from his manner it is evident that something big will happen. If any member of the Minneapolis Club made the charges against the umpire and fails to prove them it is not at all improbable that somebody will be railroaded out of the league.

"All that I have to say," says O'Brien, "is that if Owens is vindicated some one will suffer for making such serious charges. Owens is sick abed at Kansas City as a result of the attacks and he must be shown guilty of the charges or the accuser will be punished."

## BOOKIES MAKE A KILLING

### CONSISTENT WINS HANDICAP

They are equipped with automobile engines which range as high as seventy-six or eighty-horse power. Every inch of the boat is made here by these two men. They have not placed any on sale and are not after buyers. They are building the speedy machines for the pleasure there is in them

## One Day's Statistics.
