INDIANAPOLIS TO DRESS UP FOR BIG AUTO RACES

MERCHANTS WILL USE COLORS
OF THE SPEEDWAY.

MORE ENTRIES RECEIVED

(By Carburator.)

Merchants of Indianapolis have set their seal of approval on the Indianapolis motor speedway and the city will be dressed up in gala attire to greet the hordes of dusty pilgrims that are bound to wend their way to the great event that is to mark a new epoch in the automobile racing industry.

The speedway colors, white, green and dark brown, will adorn the windows of the leading stores and every effort will be made to impress the outsider with the fact that Indianapolis is a live city. The colors of the speedway have been selected with the idea of being symbolical of the course, which when completed will be a dark brown from the oil, sand and taroid that will form the surface. The buildings are all painted white with green roofs, while the grass forms another mantle of the same hue.

The speedway is almost completed and cars are now making fast time over its surface. A motorcycle yesterday afternoon made a mile well under a minute, using two miles of the completed outer track.

Cuter Track Near Completion.

The contractors will finish their work sooner than expected and the track will be ready to use August 2, instead of August 10, as first planned. The timing device that is to be installed is unlike any other timer in the world. Instead of recording the time when the car passes over the wire it will be recorded when

W WORRYING.

Strengthen His Giants Final Test.

July 28.—Manager Mc ... is worried by the team and he is leaving to strengthen it. The he agreed to let Mike Philadelphia in exchange. Moren, shows he wants team, for McGraw has e would never part with reported to the Giants, that some of the stock-Philadelphia club are way of that deal, which sh. McGraw has other est report is that he, of Ebbetts a fabulous sum, the great knuckle ball back out sixteen men in game last Saturday.

... dressed up in gala attire to greet the hordes of dusty pilgrims that are bound to wend their way to the great event that is to mark a new epoch in the automobile racing industry.

The speedway colors, white, green and dark brown, will adorn the windows of the leading stores and every effort will be made to impress the outsider with the fact that Indianapolis is a live city. The colors of the speedway have been selected with the idea of being symbolical of the course, which when completed will be a dark brown from the oil, sand and taroid that will form the surface. The buildings are all painted white with green roofs, while the grass forms another mantle of the same hue.

The speedway is almost completed and cars are now making fast time over its surface. A motorcycle yesterday afternoon made a mile well under a minute, using two miles of the completed outer track.

Outer Track Near Completion.

The contractors will finish their work sooner than expected and the track will be ready to use August 3, instead of August 10, as first planned. The timing device that is to be installed is unlike any other timer in the world. Instead of recording the time when the car passes over the wire it will be recorded when the car passes under the wire. It is the mostly costly device ever constructed for timing motorcars.

One of the important events that will take place in Indianapolis during the races will be the meeting of the contest board of the American automobile manufacturers.

The leading manufacturers of the United States will gather here and amend the new rules for 1910. Practically the heads of every important factory building motorcars will be in this city. The leading officials of the American Automobile Association will act as officials.

Ten Stoddard Cars Enter.

Announcement was made by the speedway management yesterday that the Stoddard-Dayton company, of Dayton, would send ten entries. These cars will compete in all the events in which they are eligible and are said to comprise the largest number of machines ever entered by a manufacturer in a racing meet. These entries bring the total number listed up to twenty-nine. Seventy-five machines are expected.
