

CURTISS WILL FLY HERE NEXT MONTH

Noted Aviator Spends Day in City
and Agrees to Make Ascen-
sions During Auto Races.

HIGH PRAISE FOR SPEEDWAY

Carl Fisher, G. L. Bumbaugh and
Man Unnamed Will Join the
Class of "Bird Men."

Facts About Curtiss, Called the "Bird Man"

He will come back here and fly during the automobile races next month.

He is 31 years old.

He started life as a newsboy, as soon as his Methodist preacher father would let him, at his home, Hammondsport, N. Y.

He has won many medals for bicycle achievements.

He went the fastest mile ever made by a human being when he rode his self-constructed motorcycle at Ormond Beach in 1907, covering one mile in twenty-six and two-fifths seconds.

He has been sailing in aeroplanes for a little more than two years.

He won the Gordon Bennett international contest at Rheims, France, in August, 1909, covering twenty kilometers, a little more than twelve miles, in 15:50 1-5.

Through

In telling about his foreign and that she can pronounce that only puzzle him.

Facts About Curtiss, Called the "Bird Man"

He will come back here and fly during the automobile races next month.

He is 31 years old.

He started life as a newsboy, as soon as his Methodist preacher father would let him, at his home, Hammondsport, N. Y.

He has won many medals for bicycle achievements.

He went the fastest mile ever made by a human being when he rode his self-constructed motorcycle at Ormond Beach in 1907, covering one mile in twenty-six and two-fifths seconds.

He has been sailing in aeroplanes for a little more than two years.

He won the Gordon Bennett international contest at Rheims, France, in August, 1909, covering twenty kilometers, a little more than twelve miles, in 15:50 1-5.

He won the Prix de la Vitesse on the day following, covering thirty kilometers in a fraction more than twenty-three minutes.

He is not an aeroplane "enthusiast," but a conservative inventor, who does not paint glowing futures for the flying machines. He thinks the general utility of the machines is farther off than Americans seems to believe.

Glenn H. Curtiss, king of the air, and winner in the international aviation tournament at Rheims, came to Indianapolis yesterday and left last night for Chicago.

While the wind was too strong, and his visit too short for him to make a flight in his aeroplane, yet he soared to eloquent heights in praise of the city and the Motor Speedway.

He surprised his hosts by his quiet, modest nature and his conservative view of aerial achievements. He is not a dare-devil, despite the fact that his nearest competitor for speed is a bullet, because he has traveled a mile in 26 2-5 seconds on a motorcycle, as well as having made

In telling about his foreign and that she can pronounce that only puzzle him.

Concerning his life's log, Curtiss said that he was just he had no divine blood in though his father was preacher.

"Weary legs always were me," he said as he leaned easy chair and refused a cigarette, he neither smoke "Not that I think I am lazy seemed to me as a lad in Hammondsport, carrying newspaper was losing time, when I slow as to walk. So I pennies, and the happiest in life was when I fell off my Not because I fell but because to fall off of. I never did anything without many effort same way I finally learned bicycle. That was the best conquering of the weary-legs

Machines and Wheels

He said that machines especially wheels, have always been his hobby. He has schemed, signed and planned all his he said yesterday that he new idea that he had been the dark recesses of his mind. He held firmly to his new idea that his visit to Indianapolis was doubly valuable, because something here that had a conception that he is to prove his flights wonderful.

"What was the greatest of your life?" was asked of him. "What was the greatest of your life?" was asked of him. "What was the greatest of your life?" was asked of him.

"When I got married," he said out a second's hesitation. "When I got married," he said out a second's hesitation. "When I got married," he said out a second's hesitation. "When I got married," he said out a second's hesitation. "When I got married," he said out a second's hesitation.

married eleven years, and grown to know almost

Glenn H. Curtiss, king of the air, and winner in the international aviation tournament at Rheims, came to Indianapolis yesterday and left last night for Chicago.

While the wind was too strong, and his visit too short for him to make a flight in his aeroplane, yet he soared to eloquent heights in praise of the city and the Motor Speedway.

He surprised his hosts by his quiet, modest nature and his conservative view of aerial achievements. He is not a dare-devil, despite the fact that his nearest competitor for speed is a bullet, because he has traveled a mile in 26 2-5 seconds on a motorcycle, as well as having made hazardous ascents to the clouds in his aeroplanes.

He was accompanied here from St. Louis by A. P. Warner, who has purchased one of his machines, the first to be bought by an amateur in America. Mr. Warner, who lives at Beloit, Wis., left last night for Chicago with Mr. Curtiss and will stay there until the aviator makes a flight there this week. Then he will bring his machine back to Indianapolis, where he will house it and learn to fly.

Curtiss said that J. W. Kurzon of New York, who has a Farman aeroplane, will arrive in this city some time today, and will also make Indianapolis his training grounds. Three aeroplanes are to be built in this city at once, one by Carl Fisher, one by G. L. Bumbaugh and another by a man who withholds his name. This will make a total of five flying machines at the Speedway.

Mr. Curtiss was taken to the Speedway yesterday by Carl Fisher. A. C. Newby and E. A. Moross. He declared that there is as much room there for as many machines in the air at once as were at Rheims this year.

Will Make Flights Next Month.

He made an engagement with E. A. Moross to meet him at his home in Hammondsport, N. Y., in a few days, where a contract will be made, which will bring him back to this city next month to make exhibition flights during the three-day automobile races. The date for this meet has not been determined. He also said he would send his famous Curtiss motorcycle here and believes that when the five miles of track have been paved it will be the best course on the globe. He

conquering of the weary-leg

Machines and Wheels H

He said that machines especially wheels, have always been his hobby. He has schemed, signed and planned all his life. He said yesterday that he had a new idea that he had been getting in the dark recesses of his mind. He held firmly to his new idea and estimated that his visit to Indianapolis was doubly valuable, because it

something here that had given him a conception that he is certain to prove his flights wonderfully.

"What was the greatest of your life?" was asked of him. He has linked the heavens and earth.

"When I got married," he said, "I went out a second's hesitation. I was married eleven years, and I have grown to know almost as much work as he does, and he said he would like to make an ascension discussing and planning for his wife.

PHYSICIANS DEPRIVE STONE OF MYSTIC

Declare Fabled Healing Power of
Humbugs of Advertisement
Porous Stone.

The mystic properties of the stone were shown to be the verities of the physicians attending the Medical Society of the city. The first layer of the cloud which surrounds so-called madstone was removed by Dr. S. E. Carp.

madstone was shown to be a shrewd advertisement just to earn money. Made an investment merely to find out but they do not know them. From the safe. Absurdly physicians all don't hit the mark that more than the clans of Indianapolis of it no about them.

"Yet," he said, "I have unquestioningly in the power of the stone than dream of pinning recognized medical treatment succeeds so well that the more than 1 per cent of the cases.

Dr. J. N. Hurty, secretary of the Board of Health, concluded by stating that at one time a group of citizens in one of the towns of the state who all waste very much breath and one whit convinced.

Dr. H. R. McKinstry reviled the tory of rabies, its cause and treatment up to the time

He made an engagement with E. A. Moross to meet him at his home in Hammondsport, N. Y., in a few days, where a contract will be made, which will bring him back to this city next month to make exhibition flights during the three-day automobile races. The date for this meet has not been determined. He also said he would send his famous Curtiss motorcycle here and believes that when the five miles of track have been paved it will be the best course on the globe. He practically gave a contract for an Indianapolis-made automobile, made preliminary arrangements to buy Indianapolis-made carburetors and said he was favorably impressed and wanted to give a trial to the twelve-cylinder motor made here by the Wheeler Scheiber Company.

As he left he cried back that he had his eyes opened at Indianapolis, and was surprised to find such rapid strides in modern inventions in the interior of the continent.

His first advice to Carl Fisher and others was for them to purchase gliders and get busy at once on the hills near the city. This, Fisher said, will be done at once.

"I have quit taking chances," said Mr. Curtiss, "and am simply laying low to the ground. I have run enough risks in my day and feel that it would be a fool's trick for me to see how high I could fly just for the sake of doing it. I want to devote my time to improving my machine and also must make my living by building them.

"Latham, the man who flies the highest, is an expert glider. He can go half a mile high and can then 'slide' back to earth by shutting off his motor. That takes practice and every time I do it I run a big risk. That is why I want you, here in this city, to start right in the game and learn how to glide. Get some of those crafts and mount a nearby hill, then jump off into space and glide to the ground. This will accustom you to the sensations of being cut loose from the earth, will teach you to think as coolly and quickly in midair as on the ground and will give you necessary experience."

Mr. Curtiss was entertained at luncheon at the Columbia Club and then spent several hours with Carl Fisher.

Tries to Sidestep Spotlight.

Mr. Curtiss tried to sidestep the vigilant spotlight, and, therefore, was willing to spend most of his time while in the city at the Speedway, not even registering at the hotel. He said he was in a hurry to get to Chicago, where his wife awaits him. He also said, with a laugh, that he needed her to help him out in interviews, because he is always "stumped"

stone than dream or phantasmagoria. recognized medical treatments exceeds so well that the mortality is less than 1 per cent of the cases.

Dr. J. N. Hurty, secretary of the Board of Health, coincided in stating that at one time a large group of citizens in one of the towns of the state who all waste very much breath in discussing one whit convinced.

Dr. H. R. McKinstry reviewed the history of rabies, its cause and treatment up to the time of the Dr. H. S. Thurston handled the phase of the question. The matter was discussed by Dr. Eugene B. R. Charlton and Dr. W. B.

JUMP SAVES CATA

Dr. Louis Burkhardt Brought From Runaway Team

Dr. Louis Burkhardt brought a narrow escape from death and injury yesterday, when he was in front of his automobile,

away, team crashed into cranking the machine in front of the Indiana University School of Market street and Senate

Just as he leaped to the team of horses bore down on the machine, and swung a heavy door against the car and practically The horses were hitched to a wagon belonging to the Company and had run away unhitched. Dr. Burkhardt of the motor prevented his approaching team. Some one hit him.
