price of the various articles of household consumption.

I am of the opinion that professional politicians have diverted the minds of the people away from a great many real issues while they were endeavoring to build up a feeling of hostility against the railroads. What we need along this line is a little more individual education, which can readily be obtained by referring to our protective tariff schedules and our published railroad rates.

## As to Bull Fights.

To the Editor of The News:

Sir—Noting Mrs. Leone Taylor's letter defending bull fights in comparison with automobile races, I consider it no more than right to call Mrs. Taylor's mind to the fact that the spectators killed at the automobile races were to blame for their death and no one else. I was present at the sad accident at the speedway. There were large signs numerously displayed and prominently warning people to keep away from the track. But in spite of these and the police warnings also, they would push forward to the front and it was some of these that were killed.

There is no reason for a man in a dangerous position at a bull fight, especially spectators, if they are warned time and again, as usual, take risks again.

As to comparing our amusement with bull fights, I will never compare sport anything more than with dumb beasts, and any one who by and witness such a horrid sport as a bullfight and say he is not the average amount of a man.

I know of no sport in the world so barbarous, not even prize fighting, so abominable as the sickening sight of poor horses gored to death and tortured to the point of agony as long as they will stand a while a man or two kill themselves being kept.

I have heard it from a man who was present at a bull fight that the bull, after he has starved for at least three days, is then rushed into the arena for his inhuman treatment. I do not understand how any one can say truthfully that this is a human race. Give me a human race, which people enter on of their own accord.
