EIGHTY-MILE CLIP AUTO PILOTS' PLAY

Drivers Find Speedway Oval Track Fast as Lightning in Motor Workouts.

BURMAN LIKES BRICK COURSE

Contestants and Officials on Scene Ready for Start of Big Program.

By C. E. Shuart.

Seventy-five and eighty miles an hour is just a little jaunt out at the big Motor Speedway course these days, and the resonant hum of a motor buzzing off that kind of mileage is a continuous performance that sounds like music to the motoring fan. Pilots about whom the wires have carried stories of wild dashes into seemingly the very jaws of death stand around and joke with each dther about hitting the fence at Brighton Beach or doing an aerial contortion act with a big motor mill at Atlanta or New Orleans, then calmly slip into the seat of a snorting, heaving monster of steel and clip off twenty miles in two-thirds the number of minutes. They don't mind it-it's their business.

One of the consistent performers yesterday afternoon was "Wild Bob" Burman of the Buick team. Burman rides a motor car like a Cossack does a horse. No matter where the car goes he is in the seat and coaxing out more speed.

"Wild Bob"

it—it's their business.

One of the consistent performers yesterday afternoon was "Wild Bob" Burman of the Buick team. Burman rides a motor car like a Cossack does a horse. No matter where the car goes he is in the seat and coaxing out more speed. The way he reasoned with the mechanical steeds he drove yesterday seemed to be the correct line of argument, for they did the two and a half mile stretch in far better than two minutes despite stiff motors.

Burman Likes Course.

Burman says the track is a worldbeater for speed, and especially in the short races he expects to see some marks pass into history. In the little White Model 10 Buick car he gets action that resembles that of a jack rabbit. The car hits the track every fifteen feet it seems, but it clips the seconds off the stop clock faster than the spectator thinks. These little machines are entered in the class with 161 to 230 cubic inches of piston displacement, and if they don't jump over the wall in one of the rabbitlike leaps, ought to figure in the one-twothree lists.

Louis Chevrolet and the other Buick teamsters are in the city and worked Sunday, though Chevrolet and his brother Arthur were not on the track yesterday

afternoon.

Gill Anderson and Charles Stutz of the Gill Anderson and Charles Stutz of the Marion squad put their little Marions around some merry miles in the workout. Harry Stutz, who is handling the team, got some good clock figures on the pair as the blue-rimmed cars sped under the wire. Anderson and Stutz have their motors in excellent shape now, and a couple of days' consistent workout, they believe, will put them ready for the bunting to drop. bunting to drop.

The National Indigo Twins, Aitken and Kincaid, were not on the course yesterday afternoon, as their mills are in the shop for the final overhauling before the sendoff. Merz also is getting his blue wagon in order, and today the trio is expected on the brick course. The performance of the new National "seventy" is being awaited with interest

enty" is being awaited with interest.

Art Grenier, the Chicago amateur, was at the National plant yesterday getting his "forty" stripped for action. He will appear in the workout caravan today. Tousey and Harvey in another special National "forty" probably will resume workout again this morning. The rain yesterday held many from taking the fast rounds, but the wet bricks held the tires as well as the dry, and no skids were reported as a result of the downpour.

Nearly every pilot listed to start next Friday is on the ground and all are elated over the changed conditions at the Speed-They believe the turns are inclined right for the high spots and travel over the course will be easy as long as the ma-chines hold together. They agree that no other track they have raced upon equals

the Indianapolis oval.

Al Poole, who drove the Simplex to victory at the Brighton Beach race, took "his pen in hand" and wrote asking what the Speedway would do to "get him here." The reply was a set of entry blanks, showing what he could do to get himself here and what he could try to get if he got here. Al may come on. And just by way of gathering at the big speed fest Barney Oldfield is fussing around with the stylus and papyrus. He may flirt a little ink on and papyrus. He may flirt a little ink on an entry blank before the last closing. Some of the pilots already here believe "Fence Breaking Barney" may feel a little backward on account of the competition he would face. Barney's manager, Bill Pickens, has missed a great chance to give the "Daredevil" a little astoundingly good publicity.

llong with the speeding pilots the workmen at the Speedway are completing two additional scoreboards, one at the top of the Wheeler-Schebler garage at the front of the main grand stand, the other at the top of the contestants' garage No. 1. This faces the other stand

Temporary Officers of National Elected by Delegates From Various City Organizations.

NEW YORK, May 23.—Delegates of aeronautical associations affiliated with the Aero Club of America at a meeting held at the headquarters of the latter organization here today decided to form a national aeronautic body "for the administration of aeronautical affairs of national or local character in the United States." A resolution unanimously adopted brought the organization into being under the title of American Aeronautic Association. The officers who were elected pro tem pending new elections to be held June 22 are George M. Myers, president; A. B. Lambert, first vice president; J. V. Martin, second vice president; Victor Lougheed, secretary, and Jerome Joyce, treasurer.

Action concerning the conduct and locality of the forthcoming national aviation meet was deferred until tomorrow, it already has been decided to hold the contest on Long Island, near Hempstead, but the exact place has not been selected.

The delegates at today's meeting included A. B. Lambert, representing the St. Louis Aero Club and the Indianapolis Aero Club; W. B. Strang and George M. Meyers, Kansas City; Jerome Joyce and J. Albert Hughes, Baltimore; James E. Plew, Illinois Aero Club; J. V. Martin and E. C. Brown, Cambridge, Mass.; J. S. Fanclulli, Washington D. C.; J. M. Satterfield, Buffalo, and others.
