MAKES HIS FIRST TRY TODAY

BOB BURMAN, IN KEETON.

The first time trial on the speedway of Bob Burman, shown seated in the above photograph at the wheel of his Keeton, together with Tony Janett, his mechanic, was scheduled to take place today. It will be noted that the car is distinctively French in appearance, due to its sloping hood, and the position of its radiator. Its speed is estimated at approximately 110 miles an hour. A novel feature has been incorporated in its construction by the employment of the left-

hand drive, contrary to usual speedway practice. This element, together with the space dividing his seat from that of the mechanic, front to rear, will make the task of handling the car much easier for him, Burman claims, as it will place him in a most advantageous position to observe the inside of the course, and at the same time allow him a maximum of elbow room. Burman expects to be in the running all the way this time. He also thinks that last year's record will fall, due to the evenness of the field, which will make a much more sensational race all the way
