OLDFIELD TELLS WHY HE TAKES LIFE IN HAND

DESIRES TO GAIN COMPETENCY
BEFORE QUITTING.

SAYS HE WILL STOP SHORT

Oldfield—the name spells madness. According to popular opinion, Barney Oldfield, who will drive his auto against time at the State Fair grounds Wednesday, is a speed-crazed monomaniac; a motor-mad enthusiast who juggles with life and death for the bare sensation of the thing; a crack-brained youngster who risks life and limb for the tawdry title of champion motor pilot; a notoriety seeker who takes desperate chances for the cheap reward that a cheering crowd can give.

Barney Oldfield, the man, says he is none of these things, and tells his own story to prove it. Barney is a clever talker, and has a way of using his clear brown eyes in a convincing manner. The man is absolutely frank in all he says. Whatever else he may be, he is no faker. This is his own story, told to a group of local enthusiasts, while lounging in one of the chairs in the Claypool lobby, as he nervously chewed the stump of a big black cigar:

If there is a man in this country who has a keener appreciation than myself of what it means every time I drive a mile in less than a minute, I want to see the color of his hair. They say I am a fool; they say I am a reckless driver, a wild man. I know they do, for I have heard

They say a man would not take such a chance unless he were half-crazy, and I want to be quoted as saying that all these people are dead wrong. There is just one consideration in the world that tempts me to risk my life every time I drive, and that one consideration is money. I am a firm believer in art, but I spell it with a capital M and end it with a Y.

Doesn't Care for Cheers.

I've been riding too long to care much about the crowds or their cheering. I used to be a bicycle rider and a champion in my class. That was eleven years ago, and I am only twenty-seven now. The crowds don't tempt me to take a chance. Don't you think it for a minute. Now, stop and think the matter over. I'm a champion automobilist all right. I go through the fence some day—Oh, I know it's coming some day if I stay in this business, and we may as well look the matter squarely in the face—I go through the fence and the boys come out to get me.

They'll pick me up and maybe some of them will say: "It's too bad, because Barney was a good fellow," and a few may go as far as the cemetery with me, but what does all this get me? I tell you I am as much aware of the desperate chances I take as the most timid little woman in the grandstand who was never in an automobile in her life. I'm in this game for money, and nothing else in the world. The championship? Bah, that's a detail and only figures because it helps to draw the crowd to see me work. Glory doesn't get you anything when your neck is broken, or when your left leg is wrapped around your neck and tied in a fancy bowknot. It's the money, boys, the money.

Would Like to Get Out of It.

I want to get out of this business, but I haven't as much money laid away as I ought to have and I must make so much before I can quit. You see, a fellow leading the sort of life I have been following the last few years must of necessity spend a lot of money and forms expensive habits that can not be shaken off. If I quit the game with \$25,000 it would not last me long. So the real reason I am driving over all sorts of tracks, and taking these awful chances, is because I have set my figure and need my share of the gate receipts of a big lot of meets to bring my pile up to the mark. The fault does not have to be with the driver. A little flaw somewhere in the steel—the crystallizing of a bit of metal that never shows the least weakness until it snaps, and then it's too late—a tire that blows up on the turn, and there

 money, boys, the money.

Would Like to Get Out of It.

I want to get out of this business, but
 I haven't as much money laid away as I
 ought to have and I must make so much
 before I can quit. You see, a fellow leading
 the sort of life I have been following the
 last few years must of necessity spend a
 lot of money and forms expensive habits
 that can not be shaken off. If I quit the
 game with \$25,000 it would not last me
 long. So the real reason I am driving over
 all sorts of tracks, and taking these awful
 chances, is because I have set my figure
 and need my share of the gate receipts of
 a big lot of meets to bring my pile up
 to the mark. The fault does not have to
 be with the driver. A little flaw some-
 where in the steel—the crystallizing of a bit
 of metal that never shows the least weak-
 ness until it snaps, and then it's too late—
 a tire that blows up on the turn, and there
 you are. Oh, I'm not a fool, and if you
 call me a reckless driver you insult my
 intelligence. I know what I'm doing and
 why I'm doing it, and money is the
 answer. You see, I am perfectly frank
 about it.

There Are Others.

I'm not egotistical to think there are
 no other drivers of ability in the country.
 There are lots of them. All I want is to
 have the credit given me for being the
 first man in the country to drive a racing
 car a mile under the minute on a circular
 track. I showed them it was possible, and
 after they watched how I made the turns
 without shutting off and saw it was not an
 impossible task they undertook it, and
 America now has many good track drivers.
 But I don't intend to stick to it. I value
 my life as highly as any one does. Some
 day I'm going to quit just like this [and
 here he snapped his fingers] and they'll
 wonder why Oldfield quit the game. You
 fellows will be wise then—you'll know Bar-
 ney has made his pile and will never drive
 again—not for a million.
