...touring is the number of Americans who now visit Europe in American automobiles. Everything has been made so simple by the various touring associations that the American automobilist plans for a tour through Europe with as little fear of difficulties as if he were about to make a run through the Berkshires.

"The extent of this movement is shown by the fact that three leading factories have opened Paris touring bureaus in the last two years. Mr. H. D. Wilson, the head of the Packard Motor Car Company's Paris office, says that from Jan. 1 to Sept. 30 he was in touch with more than 200 Packard touring parties, and expected to have a total of 250 at the end of the year. 'The actual number is doubtless greater than this,' explained Mr. Wilson, 'for, although I am supposed to be advised of all Packard machines coming to Europe, many owners slip away without giving us any intimation of their presence.'"

SAVANNAH DECIDES UPON ANOTHER BIG AUTO RACE

Negotiations Closed for Event Next Summer With Hopes of Equaling International 1903 Meet.

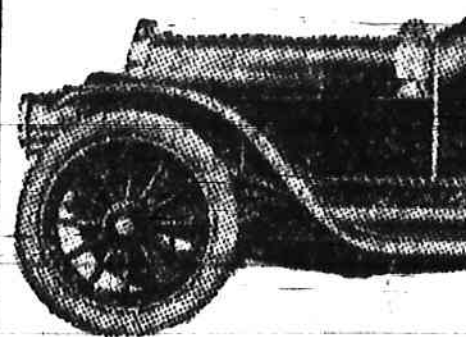

NEW YORK, Dec. 4.—It was learned on the best of authority that negotiations which have been under way for some months with a view to the holding of another big road race in Savannah have been satisfactorily concluded. The contest is to take place some time next summer. As to the kind of cars eligible, or whether the affair is to be national or international, no details are available. It is probable, however, that the race will be for stock cars and that large cash prizes will be offered in the effort to attract the stars among the foreign drivers.

Since the Grand Prize race of a year ago, the most successful contest of the kind, financially and otherwise, ever held in America, the Savannah enthusiasts have been influential enough to keep the course used on that occasion in racing condition. The race circuit, in fact, has become one of the sights of the city, and nearly all visitors to Savannah travel over it, President Taft being among its notable admirers.

In addition to widely advertising the city, the Grand Prize race proved a money maker for Savannah, the net profits being in the neighborhood of \$20,000. There is every probability, therefore, that the projected race will be arranged on a big scale, and that the men back of it will endeavor, as far as lies in their power, to make it as important as was the international struggle of 1903.

Willis Hunts Rabbits by Means of an Auto

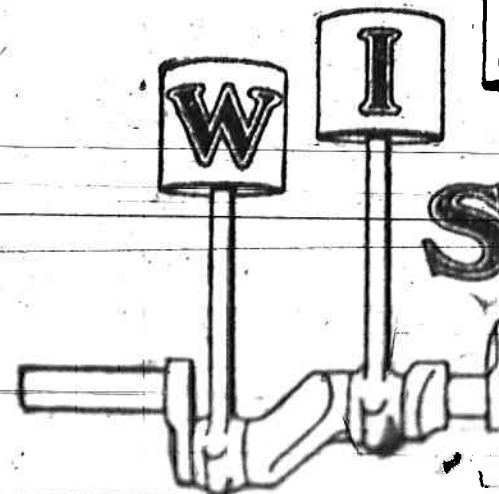

B. F. Willis recently returned from a hunting trip and he reports that rabbit hunting at night by means of an automobile beats hiking it through the woods all day. He said that he killed three rabbits in this manner in a short length of time. The method is to turn on the lamps and drive down some lonely road near a corn field. The rabbits generally run along ahead and take good targets.
