

GUYOT PREDICTS RECORD-BREAKER

Pilot of Sunbeam Racer Says All
American Marks Will Be
Lowered May 30.

HOLDS ENGLISH MARK SAFE

Visiting Speeder Asserts Contest
Will Be Grueling Fight Every
Inch of Distance.

BY ALBERT GUYOT,
Sunbeam Race Driver.

Every existing American record will be shattered in the 500-mile Speedway race of May 30, but England will still retain the world honors for speed, with the 106-mile 317-yard record made in one hour on the Brooklands track by Albert Goux very recently.

I am confident that many of the drivers, including myself, will be able to lower the existing records for the Speedway if weather and track conditions are anywhere near right, but doubt very much that any one will be able to lower the English mark. However, patrons of the Memorial day event will see the best racing ever staged here, for every one of the drivers is going in to win. The race will be a fight between G. L. Theobald, R. F. Crossman, R. N., the engineer of the Sunbeam racing team, and myself have inspected the Speedway and we are not only pleased with the track, but also are highly pleased with the United States, its people and its products.

An Old Story but True

"Some time ago there lived a king by the name of... those days there were always in the king's household a certain number of jesters whose duty it was to cut up the king and to dispel dull moments of the day. If there were no good singers they would create laughter with their own voices. You know a king could not travel in those days. Travel was limited. If the old King Cole would come and see us today, do you think we would want his fiddlers three and three? Oh, no! His time riding around in his car bears his name. Now, what do you think of this car was some great thing to this old king or not? I don't know, nor do we believe in it, but anyway his name is on it. It makes a car that is fit to ride in—the standardized. News.

AMERICANS FINE HOSTS.

We did not expect the fine reception we have received wherever we stopped. The Americans have shown themselves to be the finest hosts in the world and the best sportsmen. They have given us a hearty welcome and many assurances of their wishes for our success in the big race.

Yours is a wonderful country in other ways, too. Your automobile manufacturers are veritable wizards of industry. Your motor car factories haven't an equal anywhere in the world, and the same might well be said of their product, too. I have about decided since coming to this country that maybe your poor roads are best, after all, for they have proved a blessing to the man who buys a motor car.

The Sunbeam racer which we have brought for the speed event of Memorial day has received a few laps of tuning up on the Speedway and it is in the best of shape. We believe that our machine will be a strong contender for first place all during the 500-mile grind. Our first inspection of the local track was made in an American Underslung, which is made in Indianapolis.
