

WILL COMPETE FOR INDIANA TROPHY

Harry Stutz, chief engineer for the Marion Motor Car Company, yesterday saw the finishing touches added to the two Marion cars that are to compete in the Indiana trophy race of the Chicago Automobile Club, to be held on the Crown Point-Lowell course, June 19. Mr. Stutz, with Charles Stutz at the wheel, is shown in the picture. The car is a regular stock chassis model stripped for racing purposes, and is equipped with new racing type rims, which permit of a change of tires in thirty seconds. Charles Stutz, who is to pilot the car in the race, is a well-known Indianapolis driver with twelve years of experience. A. Monsen, of Chicago, who is to drive the Marion No. 2 entry in the race, left Indianapolis this morning, driving his car through to Chicago. This car is an exact duplicate of the one in the picture.
